

<b>Current Facility WORDLE</b>	<b><i>What did you learn tonight that should be emphasized in informational material being developed about our facility improvement plan?</i></b>	<b><i>What questions do you have that were not addressed in tonight's presentation that should be answered in this informational material?</i></b>
Outdated, cramped, aging	Innovative environments that engage student learning	Timing - year of development, timing of year re: construction, length, projection of enrollment of students& student:teacher ratios, how much is impacted by new development,
update, technology, parking	Wants vs needs	time line and other options
dark, antique, outdated	Explain the impact of future learning environments from PreK-8.	Further cost break down, the year it will be completed, and when it will affect our taxes
outdated, gloomy, cold	Student-focused, breakdown per month per household, future ready	Does the total cost include furnishings? Are the classroom sizes adequate?
old, enclosed, dingy	cost to rehab versus cost of teardown and rebuild of ide	site plan if ide is torn down and rebuilt to be able to compare to rehab of ide.
uncomfortable, outdated, institutional	increase in taxes by hh value, emphasis on how quality education impact hh value, breakdown of how each school is impacted by the proposal	timeline - when is this expected to be built? environmental impact during construction and post-construction, i.e. florescent vs LED lights, asphalt roofs vs green roof, how will this help expand the dramatic arts programs? other programs? detail around enhanced class options. What opportunities might the community have to leverage the enhanced facilities? If more environmentally friendly materials and systems are used, how would this impact the lifetime cost of the proposal?
outdated dark run-down	Focus on improved student learning, security, brighter colors and more natural lighting. Improved temperature controls.	Has the possibility of utilizing a performance contractor for this project been explored? What is the time line for the improvements to the school to be made? When will the property tax increase take effect? Do the plans account for increases in student population in the next 5, 10, 15 years?

<b>Current Facility WORDLE</b>	<b><i>What did you learn tonight that should be emphasized in informational material being developed about our facility improvement plan?</i></b>	<b><i>What questions do you have that were not addressed in tonight's presentation that should be answered in this informational material?</i></b>
Outdated limited uninspiring	Bringing Ide to a contemporary position for the future. The focus of the plan is to prepare our students to be future ready learners. It's all about what's best for the kids. The function of the building must drive the form.	What is the expectation for the growth of enrollment in the future? In the long term, would it be worth it to invest more money in a new building to replace Ide? (The core of the building is still old). Has renewable energy been considered as a resource for both mechanical application and an educational opportunity? (Particularly in the STEM environment).
outdated crowded tired	tax payers impact, detailed estimate of cost per building	what is the time frame for each building
outdated, dilapidated, boring, inefficient, unimpressive	descriptions about the different areas (STEM, learning commons, etc), financial impact, clarification about infrastructure scope, impact that this could have on students,	timelines (will our children benefit?), schedule of values (breakdown of costs by phase and areas of improvement, disruption of students (will these improvements happen during school year, noise, etc), what are the technology improvements (what comes after tablets, laptops), what value does this offer to people who do not have students or their children completed their schooling already.
dated restrictive ugly	Necessary to prepare our children for future learning	How would safety be handled in a lockdown situation with more exterior/interior windows? In addition to the outreach meetings how will you convince the "older" community that the improvements are worth their money? From an infrastructure standpoint how will Ide hold up to a remodel vs. new build? Is there a scaled back Plan B if this doesn't pass?

<b>Current Facility WORDLE</b>	<b>What did you learn tonight that should be emphasized in informational material being developed about our facility improvement plan?</b>	<b>What questions do you have that were not addressed in tonight's presentation that should be answered in this informational material?</b>
old, cold, uncomfortable	not enough space for the children for gross motor activities	influx of student population. the growing student population, to not interrupt classrooms to access areas of the building
run-down, embarrassing, ugly	The quality of our buildings/facilities doesn't represent the quality of education that we provide.	Noise level? How do we know this is the future and not just a fad? Does it make more sense to rebuild Ide? A lot of money going toward repairs that could go toward a new building. Projected growth?
confining, out-dated, friendly	This is a community enhancement that will increase property value. It will also improve community interest in value of the education of our children.	How will this be paid for? Is it a bond that needs to be improved? What is the reality of the demographics that will be included/effected? Is this growth data going to snowball as the years progress that will affect the other schools (Prairieview & Lakeview) in the future? Is safety being considered with the plans of natural light? Can natural light be implemented with with a new roof (skylights)?
uninviting, tight, outdated	cost differences between repairing ide and getting a new building, cost factors for repairs and maintenance, floor plans (what are we gaining and what are we losing)	Any windows being added for additional natural light? Gym size? Can a multi-purpose room be separate from the gym? Lack of library? Traffic flow...there was no talk of bus drop off and car pool at Ide being fixed? Will a road be built off of Fairview? Entrances for students big enough?
dark, cold, 1970's	Teacher Input distributed to parents (Teacher desires and wants) -Cost -The impact on learning - Projected Growth in The District & why The increase of space is needed	What happens if the referendum doesn't pass? What would the duration of this project be? Do the improvements and learning spaces connect & correlate with best practices in education?
Boxy, uninspiring, functional.	Taking into account future needs.	But how does this translate into student test scores/ performance? What is the expected student population in the future and is the envisioned student teacher ratio in these plans?

<b>Current Facility WORDLE</b>	<b><i>What did you learn tonight that should be emphasized in informational material being developed about our facility improvement plan?</i></b>	<b><i>What questions do you have that were not addressed in tonight's presentation that should be answered in this informational material?</i></b>
Outdated, insufficient,	Everything is future oriented and updated for current methodology. Learning is different today than in the past. Property value closely associated with school performance. Natural light & the importance to learning and health. We are bringing PK over to IDE.	Are they going to address the gym floor in Lakeview for the safety of the students? What is the blue circle near the entrance of Ider? The dining/gym at Ide, is it large enough to serve as a proper gym or is it just a multipurpose room (it seems too small)? Postcard sent for this meeting was unclear as to the meeting's purpose and overall initiative. Future meetings need to be more clear and specific especially for non parents. Why is LV entrance in back of building? No curb appeal and doesn't appear as safe. How is playground donated by community effected in Ide plan? Why are BACC & Pre K being added to Ide - is there going to be enough space with new additions from housing adds? What is the decision point between build or repair. What is timeline?

<b><i>What are three possible enhancements or improvements would you like to see in the facility improvement plan presented this evening?</i></b>	<b><i>Future Facilities Improvement WORDLE</i></b>
technology, flexible learning, more space	cutting-edge, secured, flexible
phased in approach, enhancements, playground	cheaper, durable, flexiable
Flexible furniture in the classrooms, more parking at Ide, move Early Childhood to Ide	modern, technology, futuristic
larger classrooms, built-in storage within the classroom	flexible, storage, spacious
nothing at this time	open, natural light, functional
Environmentally friendly enhancements, more reliable communication systems, flexible spacea and furnishings	inspiring, green, cutting-edge
Green/energy efficient solutions, reliable wifi, indoor gross motor skills room, effective temperature controls for each area/classroom, expanded classrooms, more collaborative spaces	efficient, bright, welcoming

<p><b><i>What are three possible enhancements or improvements would you like to see in the facility improvement plan presented this evening?</i></b></p>	<p><b><i>Future Facilities Improvement WORDLE</i></b></p>
<p>We would like to see a specific plan of how they are going to deal with the drop off / pick up configuration at all three schools. (Particularly at PV) How will the playgrounds be impacted?</p>	<p>versatile welcoming future-ready</p>
<p>Love the use of hallways and open concept work space. Flexible seating, imbedded life skills through hands on learning and community accountability (classrooms/groups). sinks, microwaves in classrooms, refrigerators, community table to meet and eat. using pull down table tops in hallways for improv staff meetings, 1:1 support, student services. Sensory sensitive environments (sound, lighting, flooring, textures of walls, curved hallways to address student perception of space and depth). Music/Sensory garden, tactile walls, water feature, zen den, mindful meditation/yoga area, calming music at change of class, lighting in the hallways, classrooms, common areas. I have a a lot more to share!!!!</p>	<p>hopeful exciting forward thinking</p>
<p>aesthetics, sensory, better opportunities for special needs, further clarification (more details), playground improvement? what is the naturescape? overall improvement (curb appeal, playground, sports fields, etc),</p>	<p>collaborative, innovative, inviting, flexible</p>
<p>How will future enrollment growth and/or decline affect the plan? How will they address natural light in interior classrooms?</p>	<p>customized adaptable inviting</p>

<p><b><i>What are three possible enhancements or improvements would you like to see in the facility improvement plan presented this evening?</i></b></p>	<p><b><i>Future Facilities Improvement WORDLE</i></b></p>
<p>an explanation of the school layout</p>	<p>flexible, welcoming, functional</p>
<p>Parking lot/main entrance... Is this the best plan for these? More room (in addition to flex rooms) Look to get state funding to lessen the cost.</p>	<p>dynamic, accommodating, flexible</p>
<p>New roof with skylights/natural light. Storage. Modernization with technology opportunities, access, and flexibility.</p>	<p>collaborative, inspiring, modernized</p>
<p>space/storage, updates, collaboration</p>	<p>Welcoming, space, flexible</p>
<p>none</p>	<p>bright, kids excited, flexible, collaborative</p>
<p>No additional comments.</p>	<p>Inspiring, energizing, a place for best practices.</p>

***What are three possible enhancements or improvements would you like to see in the facility improvement plan presented this evening?***

***Future Facilities Improvement  
WORDLE***

Improve communication to non parent community and make meeting at a later time for those working

Make sure all schools are fully ADA compliant (LV bathroom?)

As we are not experts in future learning environments, information from experts would be useful for making recommendations for changes to plans.

collaborative, open, flexible
